Type for Sale. We will now sell, cheap, all of the body type and five or six fonts of display type lately used on the Chief. The Brevier and Nonpareil are about half worn, and are in excellent condition, while the Min-ton is but little inferior to new. Our reason for not keeping it in use was, that we were compelled to have additional type for our enlargement, and did not want to mix new and old together. As samples of the work done on the type, we will furnish copies of the Chief printed on it just before the enlargement— April and May last. There are 350 pounds of Bre rier, 350 pounds of Nonpareil, and almost 300 pounds of Minion-sufficient to set the whole of two ordina ry country papers-with an abundance of extra Nonpareil quasis and figures. The type is partly in cases, but mostly tied up and boxed. The cases are in first-class condition, and will be sold with the type, and consist of five pairs of Brevier, four Minion, and four Nonpared, with three large fouts of Italie is cases. DIPHTHEBIA New and Ancessful Trentment for this Di case, with Other Facts of Importance the People.

To the Editor of the Montreal Gaze -Having learned that a severe case diphtheria had been very strangely cured, after all hopes of recovery had been abandoned. I deter-mined to obtain the facts in this case, that they might be published through your journal, for the benefit of any who may be afflicted with this terrible dissame. For this purpose, I visited West Farnham, P. Q., where I found the restored man, (Mr. Ameda hartier.) who gave me the following facts:

After a very severe attack of this dreaded disease and although receiving skillful medical treatment, after nine days he had become so had that he could not swallow, when his physician, abandoning all hopes of his recovery, it was decided, as a last resort, to try Kendall's Spavin Cure. This remedy was applied externally to the throat, and, after bein reduced one half with water, was used as a gargle continuing this treatment, he found, to his great joy, that at the end of two days he was better, an

Having had considerable experience with the emedy as a family liniment, and knowing it to be very valuable for many of the accidents and ailments to which human fiesh is liable, still I was much surprised, as well as gratified, to find a well athenticated case of the cure of diphtheria by its se-a disease that is builting the skill of the ablest physicians, and carrying so many of our children and young people to an untimely grave.

Knowing something of the origin, history and success of Rendall's Spavin Cure in the United States, I was interested to learn how it is being re ceived in Canada. I was pleased to find it very highly spoken of by those of whom I made inco ries, that it is producing marked beneficial effects wherever used, and is considered a remedy of great

The young man Chartier stated that a rela ad used it, with great benefit, for rheumatism, and a leading druggist of Montreal gave an instance of where it had effected a cure for some form of this disease. Mr. Thomas Dumphey, head waiter at the Albion Hotel, Montreal, I found, had been nearly cendall's Spavin Cure was good for such allments he made a liberal application of the remody, and as the result, the corn was removed, and he is ready to speak a good word for the means of cure, wherev

The rolls have arrived for Snively & Hedges' mill, tation of what the Spavin Cure is accomplishing for man and beast, in Canada. Of course, they are but a moiety of what might be produced, but that is not my object in this article. I would state to the far ers of Canada, that this remedy will remove warts O. C. This is a small, compact, fully illustrated work selling for only twenty-five cents, and made so plai by cuts and descriptions as to be easily comprehended by all, and will be found of great value for reference, in time of used. Over 2,000,000 copies of this sook have been printed in the United States, excluaive of the German edition—a fact not often accou-pliabed in this or any other country, in the shor space of two years.

I would here state that Dr. Kendall is prepar revised edition of his book, to be entitled "Th

Doctor at Home," which will be issued in due time n Euglish, German, and French. It will contain in increased amount of reading matter, be more ful y illustrated, and trent at great length the disease o which the human family is subject, as well as th iseases of the horse. In conclusion, I would express obligation to the entlemen who have so kindly and freely aided in in my investigations, and the satisfaction I exper enced in obtaining so good a report of what is bein accomplished by Kandall's Spavin Cure in the flour
